

InformationNOW Health Module

Summer 2011 Release Notes

Enhancements

The enhancements listed below have been implemented in the summer 2011 release of the *InformationNOW* Health module.

Immunization Compliance

- Updated *Tdap* to include grades 06 and 07.
- Updated *VAR* to include grades KG – 11.
- Overrides of *Personal*, *In-Progress*, *Compliant* and *Non-Compliant* deactivated.

Setup

- Omit Reason – Deactivated *Discontinue Reasons*.
- *Discontinue Reason* bank added.
- Situation – Added sliding scale.
- Symptom – Corrected spelling of *Joint Deformity*.
- Medication Units – Added *Puffs* and *Units* as system values.

Daily Log –

- Removed the *Task* and *Report* menus on the left side of the screen.
- Added functionality to delete pending *Dispense Medication* messages when a medication is omitted or discontinued.

Mass Manage

- Added options for *Screenings* and *Results*.
- Security Permission for *Mass Manage Screenings* must be selected in order for user to view it in menu list.

Redesigned Medication

- Medication Grid:
 - Added filters to allow the user to include *Omitted*, *Discontinued* and *Expired* medications.
 - Added *P* (Pending) or *C* (Complete) to indicate the status of the dispense records that show when the user selects the + sign beside the medication name.
 - If pending, the record displays *Dispense....*
 - If complete, the record displays *Dispensed...*
 - *Physician Written Request* removed from the UI.
 - Description field label changed to *Dosage*.
 - *Medication Dosage* in Daily Log is now pulled from *Inventory Number of Units per Dispense*.
 - Omit/Discontinue procedures separated.

- New rules added for Omit/Discontinue:
 - Omit is only allowed if the medication has no dispense record marked complete.
 - Discontinuation is required if the medication has been dispensed at least one time and the record marked complete.
 - When a medication is discontinued or omitted all inventories, schedules and pending dispenses are discontinued/omitted with the same date and reason. All pending dispense messages in the Daily Log are deleted.
- Schedule, Inventory and Dispense:
 - Added *Omitted* and *Discontinued* filters to grids.
 - Changed Omit/Discontinue section.

Group Boxes

- Replaced with standard *InformationNOW* blue bars to separate sections on a screen.

General Medical

- Medicaid Tracking data hidden in the user interface.
- Added *Dentist Detail*.

Reports

- Health Assessment Report – Dentist data is pulled from *General Medical* tab.
- Medication List:
 - Added filters to include *Inventory*, *Scheduling* and *Dispensing* by status.
 - Updated layout to pull data from fields that were changed for medication redesign.
- Medication Dispensing Checklist – Updated layout to pull data from fields that were changed for medication redesign.

Modifications

The modifications listed below have been implemented in the summer 2011 *InformationNOW* Health module.

Reports

- Medication List:
 - No longer prints duplicate times for each day scheduled.
 - No longer inserts a blank page when the report returns multiple pages of results.
- Health Assessment Detail Report – *Medication Type*, *Treatment* and *Notes* removed from layout.
- *Medication Dispensing* checklist now filters to the date range defined on the input screen.

Medication Inventory

- Now accepts decimals in the *Amount* and *Number to be Dispensed* fields.

Inventory

- Corrected Inventory count.
